→ Industrial Chimney :

What sets Thermtech Energy Equipment Pvt. Ltd. apart is our unwavering focus on engineering excellence. Our company employs a team of highly skilled and experienced professionals who are well-versed in the intricacies of chimney design, fabrication and installation. By leveraging our expertise and employing cutting-edge technologies, Thermtech Energy Equipment Pvt. Ltd. ensures that each chimney we manufacture meets the highest standards of quality and performance.

In addition to our technical process, Thermtech Energy Equipment Pvt. Ltd. understands the importance of customization. We recognize that every industry and facility has unique requirements and we strive to deliver tailored chimney solutions that perfectly align with our clients' needs. Whether it's a power plant, chemical factory, cement plant, or any other industrial establishment, Thermtech Energy Equipment Pvt. Ltd. has the expertise to design and manufacture chimneys that optimize efficiency and ensure compliance with environmental regulations.

→ Bag Filter :

The Bag Filter is a dust control device whose purpose is removing the dust contained in the exhaust gases from industrial process. It is applied to the various applications with different temperature and type of gasses by selecting the filter media accordingly. A baghouse, also known as a bag house filter, bag filter, or fabric filter is an air pollution control device and dust collector that removes particulates or gas released from commercial processes out of the air.

Bag filters, Bag Filter Manufacturer in Ahmedabad are used for the clarification/filtration of fluids that have a relatively small loading of particles to be removed. The particle suspension passes through and the particles settle in the bag.

→ Wet Scrubber :

As the pollution norms are getting stringent and the government is making sure that pollution laws are being implemented, many industries are coming up with various solutions and strategies for reducing the pollution and its management. One such solution is using pollution control equipment such as Wet Scrubbers.

→ Coal Handling System :

We are the foremost company for providing safe and efficient Coal Handling System to our esteemed clients. Offered range can be customized as per your specific requirements. This product is widely appreciated by our clients, who are situated all around the nation. Coal Handling System is stringently tested on certain parameters to eradicate any defects before delivering at your end. This product is precisely manufactured in line with industry norms using top quality components with the help of innovative techniques at a professional well-developed production unit.

→ Chemical & Pharma Vessel :

The chemical reaction vessels and pharmaceutical reaction vessel with or without agitators, are used as a condenser, collectors, for mixing, and for numerous other applications. Thermtech Energy Equipment Pvt. Ltd. offers a corresponding large variety of solutions for nearly all applications required for existing scenarios.

→ Fly Ash Silo :

Chemically and physically, fly ash can have many forms, these depend on the type of fuel combustion and treatment methods. Typical fly ash contains a significant amount of silicon dioxide and calcium oxide, which make it frictional and abrasive. Usually, fly ash has a fine particle size distribution with most less than 100 microns. Given the fine particle size, frictional nature and high temperature, fly ash can be a material hard to handle. In modern coal-fired power plants, fly ash is generally captured by electrostatic precipitators or other particle filtration equipment before the flue gases reach the chimneys.

→ Wood Chipper Machine :

Thermtech Energy Equipment Pvt. Ltd. is a leading wood chipper machine manufacturer in the country. We offer a wide range of reliable, high-performance machines that can handle any kind of wood. From small backyard projects to large commercial applications, we have the perfect machine for you. Our machines are built with heavy construction and top-quality components, so you can be sure you're getting the best possible product.

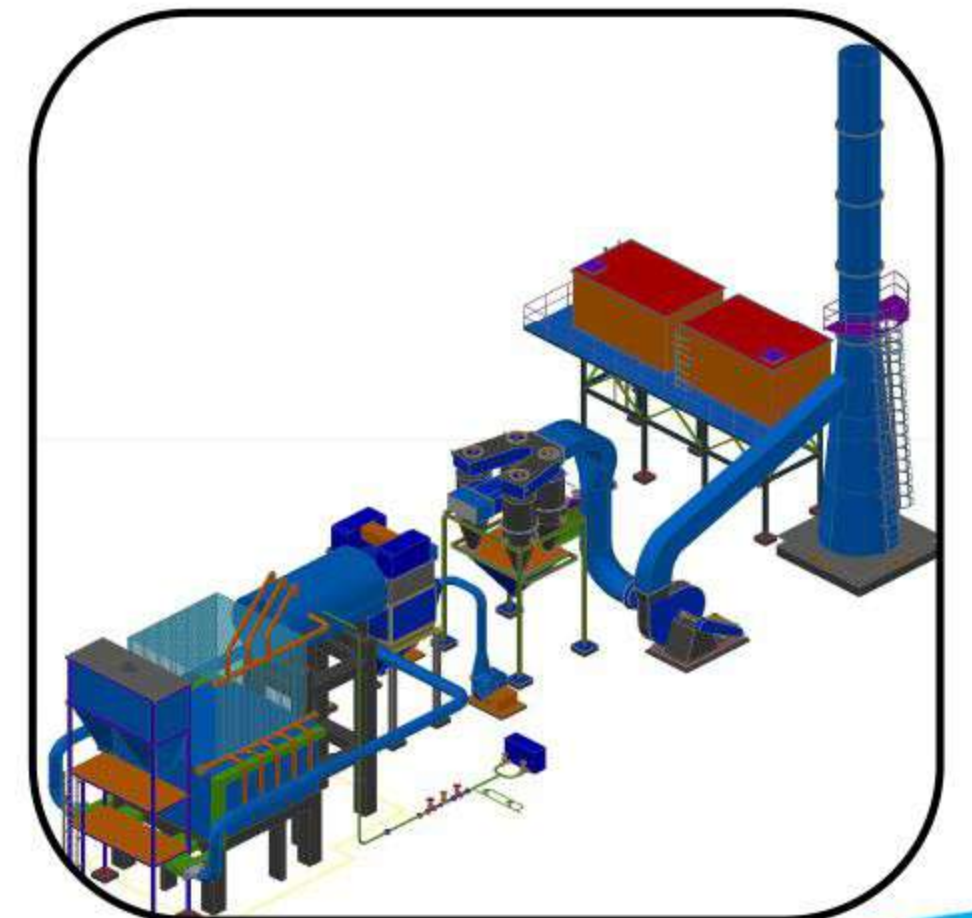

→ MS SS Pipe & Pipe Fitting (IBR OR Non IBR) :

→ Our Services :

- ☛ Boiler / Thermic Fluid Heater Turnkey Project
- ☛ MS SS heavy STRUCTURE fabrication work
- ☛ MS SS storage tank
